# Truth Always Wins

In an evolving world of technology and globalization, sophisticated tools are needed to quickly identify threats. As nefarious actors learn to evade detection, state-of-the-art tools are needed to maintain a safe and secure environment. Quant Azimuth offers the highest level of lawful interception intelligence for governments and telecom providers.

ARTIFICIAL INTELLIGENCE

Our mission is to make the world a safer place. We are passionate about solving real-world problems by offering solutions that efficiently and effectively: collect, process, and analyze information. With a combination of people, process, and technology, we offer a portfolio of tools that protect municipalities, nations, and international entities. Our solution has been built from the ground-up to analyze and visualize complex datasets so that our clients can uncover important patterns in an ocean of information.

Our Development Team are experts in the **extraction and analytics** of massive IP Metadata, Geo-Location, Voice over IP, Open Source Intelligence, Dark Web, Social Media and many other data sources.

Law enforcement Agencies and National Emergency Authorities use our Cyber Intelligence Platform to aggregate traffic from various high-speed networks, protocols, and application sources to **quickly assess** potential threats and targets behavior. This information is analyzed into various visualization tools so that investigators can make informed decisions and take appropriate actions.

We understand the importance of fast reactivity. For this reason Quant Azimuth's solutions are developed 100% in-house, enabling our experts to **quickly adapt** to our client's evolving requirements.
