

NATIONAL EMERGENCY MANAGEMENT

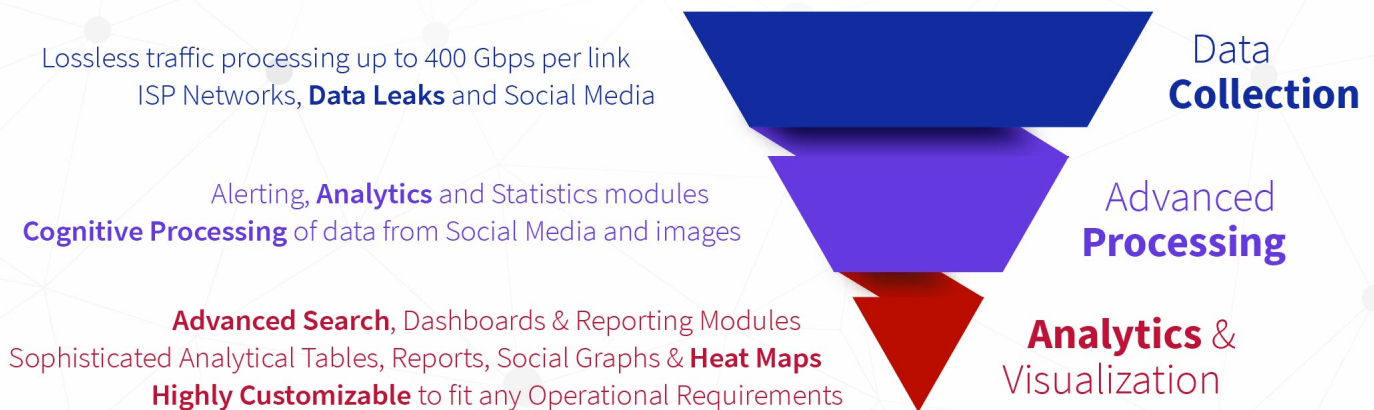

CYBER
INTELLIGENCE
PLATFORM

Quant Azimuth's **National Emergency Management** is designed for public safety and rescue teams to perform advanced analytics by scanning nation-wide traffic to spot unusual events. The platform detects, classifies data, extracts location and timestamps from metadata to display alerts.

contact@quantazimuth.com

By offering a cutting-edge portfolio of Artificial Intelligence and Big Data tools, Quant Azimuth protects valuable assets. We shine a light on clues that are hidden from traditional methodologies. Our solutions are customizable to seamlessly integrate with the operational infrastructures of governments and the private sector. Our solutions are built from the ground-up to **analyze and visualize complex datasets** so that our clients can uncover important patterns from an ocean of information. With this offering our clients are optimized to make effective and informed decisions.
